LEADERSHIP

Chairman & CEO Message

It is an honor to lead AK Pharma Engineering, a company built on the conviction that pharmaceutical manufacturing in Pakistan deserves machinery and tooling of truly international quality.

Every blister machine, every die set, every chiller we ship carries the responsibility of producing medicines that reach patients. That responsibility shapes how we design, how we machine, how we test, and how we support our clients long after commissioning.

Our team brings decades of hands-on experience across pharmaceutical packaging, tablet compression, sachet filling and supporting utilities. We combine in-house CNC manufacturing with disciplined validation practices to deliver equipment that performs reliably for years.

As we continue to grow across Pakistan and into export markets, our promise remains the same: honest engineering, transparent specifications, on-time delivery and lifetime partnership.

Thank you for placing your trust in AK Pharma Engineering.

M. Khizar Hayyat

Chief Executive Officer, AK Pharma Engineering

ABOUT US

Engineering pharmaceutical excellence

AK Pharma Engineering is a specialized manufacturer of pharmaceutical packaging and processing machinery, headquartered in Faisalabad, Pakistan. From our facility we design, fabricate and supply blister packing lines, tablet presses, sachet machines, strip packaging equipment, precision tooling and complete turnkey projects to GMP-regulated industries across Asia, the Middle East and Africa.

Under the leadership of CEO M. Khizar Hayyat and management of M. Asif, we combine modern CNC manufacturing, rigorous quality control and field-proven engineering experience. Our commitment is straightforward — deliver dependable equipment, support it for life, and earn the long-term trust of every client we serve.

15+

YEARS

200+

MACHINES

50+

CLIENTS

100%

GMP

WHAT WE DO

- In-house design, fabrication and assembly of pharmaceutical machinery
- Precision OEM-equivalent dies, rotary punches and change parts
- Installation, commissioning, FAT and SAT support
- Validation documentation (URS, DQ, IQ, OQ, PQ) aligned with cGMP
- Annual maintenance contracts, calibration and 24/7 breakdown support

DIRECTION

Vision, Mission & Core Values

OUR VISION

To be a globally recognized name in pharmaceutical engineering — a trusted Pakistani manufacturer delivering machinery, tooling and turnkey solutions that empower pharmaceutical companies worldwide to produce safe, high-quality medicines.

OUR MISSION

To engineer and supply reliable, GMP-aligned pharmaceutical machinery and precision tooling — supported by responsive service, validation documentation and lifelong partnership — at a value that opens international quality to every manufacturer.

CORE VALUES

Integrity

Honest specifications, transparent pricing, on-time delivery.

Precision

Micron-level tolerances and validated quality on every build.

Partnership

Lifetime support for the machines and tooling we deliver.

Innovation

Continuous improvement in design, materials and processes.

Compliance

Engineering aligned with cGMP and global regulatory standards.

Safety

Operator safety and product integrity built into every design.

CAPABILITIES

Product Portfolio

AK Pharma Engineering offers a complete catalog of pharmaceutical machinery and precision tooling — from primary packaging lines to compression presses, dies, punches and supporting utilities.

PRIMARY PACKAGING

- Alu-Alu Blister Packing Machine DPP-260
- Alu-PVC Blister Packing Machine DPP-160
- Strip Packing Machine
- Sachet Packing Machine

TABLET COMPRESSION

- Single Punch Tablet Press
- Rotary Tablet Press (17 / 27 / 35 / 45 stations)

PRECISION TOOLING

- Blister Machine Dies
- Alu-Alu Dies
- Alu-PVC Dies
- Rotary Tablet Punches & Dies (TSM / EU)

SUPPORTING UTILITIES

- Water Cooling Chillers (3 – 30 kW)
- Expiry Date Coding Systems (CIJ / TIJ / TTO)

ENGINEERING SERVICES

- Pharmaceutical Tooling — change & spare parts
- Custom Pharmaceutical Engineering Solutions

PRODUCT

Alu Alu Blister Packing Machine DPP-260

Fully automatic Alu-Alu blister packing machine for cold forming of hard-tempered aluminum foil. Engineered for high-barrier pharmaceutical packaging with superior protection against moisture, oxygen and light.

KEY FEATURES

- PLC control with 7" HMI touchscreen
- Servo-driven indexing ± 0.1 mm registration
- Quick-change forming and sealing dies
- SS304 / SS316 contact parts
- Integrated batch coding and embossing

TECHNICAL SPECIFICATIONS

Max forming area	240 × 130 mm
Forming depth	Up to 12 mm
Output	30 – 60 cycles / min
Power	380 V / 50 Hz, 8.5 kW
Dimensions	3650 × 720 × 1700 mm
Net weight	1600 kg

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Alu PVC Blister Packing Machine DPP-160

Compact, economical Alu-PVC blister line for small to medium pharmaceutical batches. Excellent balance of footprint, output and reliability.

KEY FEATURES

- Flat-plate sealing system
- Thermo-controlled forming station
- Photoelectric registration
- Servo cutting with adjustable stroke
- FDA-grade contact surfaces

TECHNICAL SPECIFICATIONS

Max forming area	150 × 110 mm
Forming depth	Up to 10 mm
Output	25 – 45 cycles / min
Power	380 V / 50 Hz, 4.5 kW
Dimensions	2500 × 600 × 1600 mm
Net weight	900 kg

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Sachet Packing Machine

Multi-lane VFFS sachet machine for hygienic dosing of pharmaceutical powders, granules and liquids into four-side sealed sachets.

KEY FEATURES

- 2 to 8 lane configurations
- Volumetric / auger / piston dosing
- Servo-driven film transport
- Hot air or ultrasonic sealing
- Tool-free roll changeover

TECHNICAL SPECIFICATIONS

Sachet size	30×40 to 90×120 mm
Fill volume	0.5 – 30 g
Output	60 – 480 sachets / min
Power	380 V / 50 Hz, 6 kW

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Strip Packing Machine

Robust four-side heat-sealed strip packaging machine for tablets and capsules requiring individual dose protection in aluminum foil strips.

KEY FEATURES

- Knurled roller heat-sealing
- Automatic multi-hopper feeding
- Digital temperature controllers
- Servo cutting & perforation
- Reject station for incomplete strips

TECHNICAL SPECIFICATIONS

Strip width	Up to 160 mm
Pockets per strip	4 – 12
Output	60 – 120 strokes / min
Power	380 V / 50 Hz, 5 kW

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Rotary Tablet Press Machine

Multi-station rotary tablet press for continuous high-volume pharmaceutical tablet production. Available in 17, 27, 35 and 45 station configurations.

KEY FEATURES

- Pre-compression and main compression
- Force feeder for uniform die filling
- Touch HMI with recipe management
- Automatic lubrication system
- Sound-attenuating enclosure

TECHNICAL SPECIFICATIONS

Stations	17 / 27 / 35 / 45
Max force	100 kN
Tablet diameter	Up to 25 mm
Output	Up to 230,000 tabs/hr
Power	380 V / 50 Hz, 7.5 kW

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Blister Machine Dies & Tooling

Custom precision forming, sealing and cutting dies for Alu-Alu and Alu-PVC blister machines. CNC machined and hand-finished to micron tolerances.

KEY FEATURES

- CNC machined hardened tool steel
- Mirror-polished forming cavities
- Reverse-engineered to existing machines
- Heat-treated for long life
- Drop-in OEM replacement

TECHNICAL SPECIFICATIONS

Material	Tool steel / SS420 / brass
Surface finish	Ra < 0.4 μm
Compatible	DPP, IMA, Uhlmann formats

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Rotary Tablet Punches & Dies

Complete sets of rotary tablet punches and dies to TSM and EU standards. B-type and D-type configurations with custom engravings, logos and break lines.

KEY FEATURES

- TSM & EU compliant
- Custom embossing and bisect options
- DC53 / S7 tool steel
- Mirror-polished cup surfaces

TECHNICAL SPECIFICATIONS

Standards	TSM, EU, B-type, D-type
Shapes	Round, oval, oblong, custom
Material	DC53, S7, S2 tool steel

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Water Cooling Chillers

Compact, energy-efficient water cooling chillers sized to maintain precise temperatures for blister machines, presses and tooling cooling.

KEY FEATURES

- Scroll compressor R410A
- Stainless steel water tank
- Microprocessor controller
- Low-water & high-pressure alarms

TECHNICAL SPECIFICATIONS

Cooling capacity	3 – 30 kW
Temperature range	5 – 35 °C
Power	380 V / 50 Hz

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

PRODUCT

Expiry Date Coding Systems

Reliable on-line printing solutions for batch numbers, manufacturing dates, expiry dates and pricing on pharmaceutical packaging.

KEY FEATURES

- CIJ / TIJ / TTO options
- Pharma-grade inks
- Encoder-driven
- Easy line integration

TECHNICAL SPECIFICATIONS

Print speed	Up to 300 m/min
Character height	1 – 12 mm
Power	220 V / 50 Hz

APPLICATIONS

Pharmaceuticals, nutraceuticals, veterinary medicine, hospital supply and contract manufacturing across GMP-regulated industries.

CAPABILITIES

Manufacturing & Engineering

DESIGN & ENGINEERING

3D CAD modelling, finite element analysis, electrical and pneumatic schematic design.

CNC MACHINING

Precision turning, milling and EDM with tolerances down to ± 0.01 mm.

FABRICATION & ASSEMBLY

Stainless steel fabrication, mirror polishing and clean assembly areas.

ELECTRICAL & CONTROLS

PLC programming, HMI development, servo drive integration and safety circuits.

TESTING

Functional, leak, pressure and endurance testing before dispatch.

VALIDATION

URS, DQ, IQ, OQ, PQ packs aligned with cGMP and 21 CFR Part 11.

QUALITY

Quality Control & Assurance

Pharmaceutical machinery must run reliably for years and produce packaging that protects patients. Our quality system covers incoming materials, in-process machining checks, sub-assembly testing, full-machine FAT and post-installation validation. Every shipment is accompanied by inspection reports, material certificates and operating documentation.

GMP-Aligned Design

Materials, surface finishes and ergonomics designed around cGMP.

Validation Documentation

URS, DQ, IQ, OQ, PQ packs delivered with every machine.

Material Traceability

Mill certificates and inspection reports on critical components.

FAT & SAT Testing

Factory and site acceptance tests verified against agreed criteria.

SERVICES

Engineering Services & Client Support

Machinery Manufacturing

In-house design and fabrication of blister, strip, sachet and tablet machines.

Precision Tooling

Forming, sealing and cutting dies, plus rotary punches to TSM / EU standards.

Installation & Commissioning

Site survey, mechanical and electrical installation, FAT and SAT.

Validation Support

IQ, OQ and PQ documentation aligned with cGMP and 21 CFR Part 11.

Spare & Change Parts

Reverse-engineered parts for legacy and imported machines.

Annual Maintenance

Preventive maintenance, calibration and 24/7 breakdown support.

Operator Training

On-site and classroom training for operators and engineers.

Turnkey Projects

End-to-end project delivery from URS to handover.
